Brief personal and professional description

Experienced **Senior Full Stack Developer** with over 9 years of expertise in building and maintaining complex web applications, with a strong focus on backend technologies like **ASP.NET Core** and frontend frameworks such as **Angular 16** and **React**.

My background includes extensive experience in cloud platforms such as **Azure** and **AWS**, and in developing **microservices** and **REST APIs**. I am well-versed in implementing **CI/CD pipelines** to ensure seamless deployment and have a proven track record in creating secure, scalable solutions in diverse environments.

Development and maintenance of evolution features and correcting bugs. Guarantee the code quality and carries out **unit tests and some integration and end-to-end tests**
